

LONE STAR LEGAL SERVICES, LLC

Lone Star legal Services, LLC specializes in creating properly designed Estate Plans for each client regardless of their financial net worth. Trusts, Living Wills, Asset Protection LLC Entity Formations along with Durable Power of Attorney, Advanced Healthcare Directives and HIPAA Medical Disclosure Authorization Documents are effective tools to manage financial and healthcare decisions as part of Estate Planning.

A Revocable Living Trust created as an entity is necessary to avoid the expensive 18 to 48 month Probate Court process. The Trust allows for decisions on how assets are distributed and managed during life and after death. The Trust includes determining Guardianship for minor children, managing financial affairs and healthcare decisions. Without an up to date Estate Plan, the client may have someone attempting to control their financial assets or medical decisions that do not have their best interests in mind. Creating a customized Estate Plan illustrates how they want their affairs managed and assets distributed in the future.
